

Are You in the Right Job?

Video #1 - An Introduction

In this video, we asked some questions about your job, and what you might be thinking about it.

Whether you love your job and want to stay – or whether you can't wait for something better in a new job – this questionnaire & video series will help you find what God's plan is for your working life, and how your work fits with His plan also.

Let's start by thinking about the job that you have today. Answer each of the questions below as honestly as you can, in the space provided. You might want to use more space and that's OK, but we have intentionally limited the space available to help you think more critically about your answers, revising & modifying them as needed to fit in the space provided.

1. What is your current job? Describe it in a way that someone not familiar with your work can understand.

2. What do you like about your work? Why do you like that?

3. If you could have another job right now, what would it be? Why do you choose that?

4. If you look ahead by 5-10 years, what kind of job do you hope to have then?

5. Do you think God has a calling for you in your working life? If so, what might that be?
